Dear Jiachen,

I am delighted to inform you that we are offering you a position as a Warren Alpert Computational Biology and AI Network Fellow. Warren Alpert Computational Biology and AI Network Fellows will form a network of trainees from different institutions that will learn and collaborate together.

As a Warren Alpert Computational Biology and AI Network Fellow, you will be expected to participate in the Computational Genomics Summer Institute (CGSI) at UCLA for at least 1-week both in the Summer of 2024 and 2025. In addition, you will be expected to participate in a research focused class in Fall 2024 where you will work collaboratively on computational biology and AI focused research with CGSI participants from other institutions, which is taught through the Computational Medicine's Data Science in Biomedicine MS program.

The award will cover CGSI registration for two summers. In addition, the award covers extra tuition associated with the research class. Please note that the award does not provide any salary or stipend support. It also does not provide support for regular UCLA tuition.

For this summer, you will be officially admitted to the second short program of CGSI from July 29th – August 2nd. We expect you to participate the entire week. However, you are also welcome to attend some of the talks during the first short program, July 15 – July 19, if some of the speakers or topics particularly interest you. If you do, please identify yourself at the registration desk. The schedule for the first short program will be available on the website and on the Whova app (more information will be available in your CGSI invitation letter) in a few weeks.

To accept the offer, reply to this email by Friday, June 21st confirming that you have read and understand the contents of this email and that you accept the offer.

If you have any questions, please let me know.

Sincerely,

Jason Ernst

Director of Warren Alpert Computational Biology/AI Training and Retention Program
